Summary

Experienced **Ruby on Rails** Developer with **5 years** of expertise in building scalable web applications. Skilled in **React** and **Elixir**, with a strong background in developing APIs and feature-rich solutions. Proactive in improving development processes—pioneered test writing and onboarding systems in a previous role. Passionate about clean, maintainable code and optimizing performance. Looking for opportunities to contribute technical expertise and innovation to a dynamic team.

Skills

Backend: Ruby, Ruby on Rails, Elixir, Phoenix, Sinatra, Rspec, FactoryBot, ActionPolicy, sidekiq, rabbitmq, redis, pg, sql, dry-rb, ransack.
Frontend: React, redux, redux-toolkit, javascript, HTML, CSS, webpack, Vite, bootstrap, jest, coffeescript, slim.
Other: Docker, Docker Compose, Git, Vim, Rubocop.

Experience

Full-stack Developer - ChatPush   06/2023 - present

· Integrated the ActionPolicy gem and workflow to enhance authorization management
· Developed frontend features using Vanilla JS and React, improving user experience
· Reworked a frontend feature involving Redis, Sidekiq, and React, enhancing performance
· Built and optimized backend features in Elixir, expanding system capabilities
· Implemented an AI-powered assistant by integrating with OpenAI's API
· Managed email newsletters, utilizing Mustachio templates via PostmarkApp
· Automated recurring invoice processing, reducing manual workload for users
· Optimized SQL queries for better performance, including Arel.sql usage
· Collaborated closely with QA, developers, and business stakeholders to improve product quality
· Dockerized the development environment, for a streamlined and consistent workflow

Ruby on Rails developer - Basistech   01/2021 - 10/2022, 18 years

· Worked on features related to integration with virtualization systems
· Refinement of an existing product
· Optimization of work with a third-party platform: pagination, code optimization
· Hiding passwords in application logs by overriding gem methods (sidekiq, rails, httparty)
· Writing features, the refinement of which affects the front and back

Ruby Developer - At Consulting   01/2020 - 12/2021, 1 year

· Optimizing the work of the project through asynchronous signal processing
· I have prepared an onboarding for the project
· Project health support
· Improvements related to backup Virtual Machines

Ruby Intern - At Consulting   09/2019 - 01/2020, 3 months

· Completed the Ruby on Rails internship

Education

Specialist in Applied Informatics - Moscow State University (MSUPE)   2010 - 2017

· Studied software development and information systems
· Gained practical experience in programming and database management
