Summary

Experienced **Ruby on Rails** Developer with **6 years** of expertise in building scalable web applications. Skilled in **React** and **Elixir**, with a strong background in developing APIs and feature-rich solutions. Proactive in improving development processes—pioneered test writing and onboarding systems in a previous role. Passionate about clean, maintainable code and optimizing performance. Looking for opportunities to contribute technical expertise and innovation to a dynamic team.

Skills

Backend: Ruby, Ruby on Rails, Elixir, Phoenix, Sinatra, Rspec, FactoryBot, ActionPolicy, sidekiq, rabbitmq, redis, pg, sql, dry-rb, ransack.

Frontend: React, redux, redux-toolkit, javascript, HTML, CSS, webpack, Vite, bootstrap, jest, coffeescript, slim.

Other: Docker, Docker Compose, Git, Vim, Rubocop.

Experience

Full-stack Developer - ChatPush

06/2023 - present

- **Investigated** a production PostgreSQL performance bottleneck using **EXPLAIN ANALYZE**, identifying an indexing opportunity that **reduced execution time from 257 ms to 0.3 ms** for a frequently executed query on a **56M+ row PostgreSQL table**.
- **Identified** and fixed a business-critical logic flaw in SMS rate limiting, **preventing excessive SMS requests** and reducing unnecessary operational costs.
- **Mitigated** critical security vulnerability (CVE-2025-68696) in **HTTPParty** gem, **preventing potential API key leakage** through SSRF attack by upgrading via Bundler-Audit.
- **Reduced** CI test execution time by **50%** (2x faster) in **DroneCI** by integrating **parallel_tests** gem and optimizing parallelization, significantly shortening developer feedback loop.
- **Implemented ActionPolicy** authorization system, streamlining permission management and **strengthening application security**.
- **Developed** multiple frontend features using **React** and Vanilla JS, **significantly improving user experience and interface responsiveness**.
- **Reworked** key frontend feature with **Redis**, **Sidekiq** and **React**, **boosting performance and efficiency**.
- **Designed** and optimized backend services in **Elixir**, **expanding system scalability and capabilities**.
- **Implemented AI-powered assistant** integrated with **OpenAI API**, enabling intelligent user interactions and enhancing product value.
- **Automated** recurring invoice processing, **significantly reducing manual workload** for the team and minimizing errors.
- **Optimized** slow **SQL queries** using **Arel.sql** and other techniques, **improving overall application performance**.
- **Managed** email newsletters with **PostmarkApp** and **Mustachio** templates, ensuring reliable delivery and high customization.
- **Resolved** critical bugs and closely collaborated with QA, developers and stakeholders, **elevating overall product quality and stability**.
- **Dockerized** development environment using **Docker Compose**, achieving consistent setups and **reducing environment-related issues** across the team.

Ruby on Rails developer - Basistech

01/2021 - 10/2022, 1.8 years

- **Integrated** the application with virtualization systems, enabling seamless management and automation of virtual resources.
- **Enhanced** existing product features, improving stability, usability and overall code quality.
- **Optimized** integration with third-party platform, implementing pagination and code refactoring, which significantly improved performance and reliability.
- **Enhanced** application security by hiding sensitive credentials in logs through overriding methods in **Sidekiq**, **Rails** and **HTTPParty** gems.
- **Developed** and refined full-stack features spanning both frontend and backend, ensuring consistent functionality across the entire application.

- **Optimized** project performance through asynchronous signal processing, improving system responsiveness and resource efficiency.
- **Developed** comprehensive project onboarding documentation and process, accelerating new developer ramp-up time.
- **Maintained** project health by monitoring, fixing technical debt and proactively resolving production issues.
- **Improved** Virtual Machines backup processes, increasing reliability and recovery capabilities.

- **Completed** intensive **Ruby on Rails** internship, gaining hands-on experience in full-stack development and production system maintenance.

Education

- Studied software development and information systems
- Gained practical experience in programming and database management
